International Congress On **Disaster and Emergency Medicine**

MESSAGE FROM THE PRESIDENT

Dear Colleagues, Dear Disaster Medicine Partners,

I am honored to invite you to Istanbul held on November 26 – 29, 2015, for the International Congress on Disaster and Emergency Medicine.

In this Congress we will consider what we can do to handle disasters, and their effects on people, our pets and environment.

Disasters, whether natural or man-made, have occurred over the centuries and has taken the lives of human beings. Natural disasters like earthquake, flood, tornado, mudslide and man made disasters as accidents, wars, migrations, mine accidents keep on occurring. We know how these disasters effect our lives.

We have enough experience on the effects of worldwide disasters. We can easily handle these effects if we share each others experiences.

Istanbul has faced a devastating earthquake 15 years ago and waiting for a bigger one.

The Balkans and the Middle East witnessed wars, conflicts and migration.

The USA has faced terrorism. She is now discussing the methods to handle tornado, wild fires and climate change.

China is struggling with land slides, floods and fires each year.

Japan has learned that the best way to get ready for earthquakes is public awareness and safe buildings.

Far East has gained experiences on earthquake, tsunami and hurricane-related disasters.

We want to bring together the disaster medicine experts from different parts of the World in Istanbul held on November 26 – 29, 2015.

Hand in hand we can minimize the disaster damage. If we share our experiences, disasters can not defeat mankind.

See you in Istanbul.

Best regards

Ulkumen Rodoplu, MD

Chair, Turkish Emergency Medicine Association for All

- Education Programs about Disasters
- Global Warming
- Human resources management and Disasters
- Identification Process During Disasters
- International Collaboration Between Countries in Disasters
- International Support During Disasters
- Lessons learnt from the Last Disasters in the World
- Morbid obese patient
- Patients with Disabilities
- Pregnant Women
- Prisoners
- Role of Nurses During Disasters
- Role of Paramedics/Ambulance and Emergency Care Technicians During Disasters
- Role of Social Media During Disasters
- Cyber Terrorism and Health System
- (Iranian Bam and Pakistan Earthquakes, Boston Marathon Bombing, Tokyo Sarin Gas attack)

AN APPROACH TO SOME MEDICAL EMERGENCIES

- Advanced Cardiac Life Support
- Analgesia and Sedation in Emergency Department
- Anorectal Emergencies
- Approach to Patient with Chest Pain
- Approach to Patient with Multitrauma

► Main Topics

- Approach to Patient with Sepsis in Emergency Department
- Approach to Patients with Syncope.
- Approach to Patients with Abdominal Pain
- Approach to Patients with Gastrointestinal Bleeding
- Art of Consultation in Emergency Department
- Being an Emergency Physician in Auster Conditions
- Burn out Syndrome in Emergency Department
- Cardiological Emergencies
- Communication between docs and patient relatives.
- Communication in Emergency Department
- Decision of Death in Emergency Department
- Deep Vein Thrombosis in Emergency Department
- Emergency Medicine and Forensic Medicine Issues
- Emergency Airway Management
- Enviromental Emergencies Burns, High Altitude Disease, Hypo-Hyper thermia, Electrical Injuries, Lightening Injuries
- Ethics about Resuscitation
- Family Witnessed Resuscitation
- Gastrointestina Emergencies
- Gastrointestinal Emergencies
- Geriatric Emergencies
- Geriatric Emergencies
- Gestational Emergencies
- Hemostasis on the field and Emergency Department
- How does the law and the court approach to EM ?
- Insurance System Against Malpractice in EM.
- Media and Emergency Medicine
- Neurological Emergencies
- Organ Donation in the Emergency Department
- Organization of Ambulance Dispatch Centers
- Ortophedic Emergencies
- Patient Safety and Risk management in Emergency Department
- Psychiatric Emergencies
- Pulmonary Embolus

- Respiratory Emergencies
- Respiratory Emergencies
- Resuscitation
- Sports Emergencies
- Street Drugs
- Tetanus and Prophylaxis
- Toxicological Emergencies
- Trauma Emergencies
- Triage; Emergency Department and Disasters
- Urological Emergencies
- Vascular Emergencies
- Violence in Emergency Medical System
- Which Trauma System? Anglo-American or Franco-German?
- Wound Care and Suture Techniques

TOPICS RELATED TO EMERGENCY NURSING

- Acute Cerebrovascular Accidents and Nursing Studies
- Acute Coronary Syndromes and Nursing Studies
- Being an Emergency Nurse and its Difficulties
- Definition of Emergency Nursing? Legal Issues about Emergency Nursing
- Effect of Nurses on Emergency Physician's Practice

- Main Goals of Turkish Nurses Association
- Making correct decisions during critical moments.
- Nursing Care During Evaluation and Management of Patients with Shock in Emergency Department
- Patient with Multitrauma and Nursing Studies
- Role of Nursing Care During Evaluation and Management of Burn Patient in Emergency Department
- Role of Nursing Care During Evaluation and Management of Critical Patients in Emergency Department.

International Congress On **Disaster and Emergency Medicine**

► Main Topics

- Role of Nursing Care During Evaluation and Management of Geriatric Patients in Emergency Department
- Role of Nursing Care During Evaluation and Management of Patients During Thrombolytic Therapy in Emergency Department
- Role of Nursing Care During Evaluation and Management of Patients with Acute Cerebro Vascular Accident in Emergency Department
- Role of Nursing Care During Evaluation and Management of Patients with Acute Coronary Syndrome in Emergency Department
- Role of Nursing Care During Evaluation and Management of Patients with Multitrauma in Emergency Department
- Role of Nursing Care During Evaluation and Management of Psychiatric Patients in Emergency Department
- Role of Nursing Care During Evaluation of Patients on Mechanical Ventilation in Emergency Department
- Which patient High Risk in Emergency Department Working Together? Is it Possible?

WORKSHOP TOPICS

- Advanced Cardiac Life Support (ACLS)
- Advanced Pediatric Life Support (PCLS)
- Advanced Trauma Life Support (ATLS)
- Airway Management, Recent Advances
- EKG and Rhythm Analysis
- Hospital Disaster Plan
- Suture Techniques
- Ultrasound

► Who Can Participate?

STAFF OFF EMERGENCY DEPARTMENT

- Emergency Department Doctors
- Emergency Department Nurses

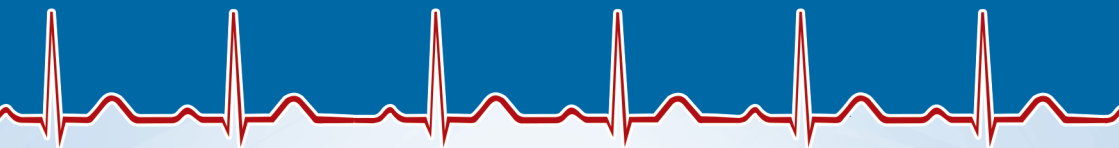

- Emergency Medicine Specialist
- Emergency Medicine Assistant
- Head of the Department of Emergency Medicine
- Health Officer

PREHOSPITAL EMERGENCY SERVICES

- Ambulance and Emergency Care Technician (Paramedics)
- Ambulance and Emergency Care Technicians
- Ambulance Companies and Managers
- Ambulance Physicians
- Family Doctors
- Firemen
- Izmir Search and Rescue Service (AKS) Employees
- Izmir Search and Rescue Service (AKS) Managers
- Private Ambulance Companies

HEALTH FACILITY MANAGERS

- Archives and Medical Statistics Services
- Chief physician
- Chief Physician Assistants
- Civil Defence Specialists
- Clinical Chief, Assistant Chief
- Head Nurses of Hospital
- Heads of Departments
- Hospital / Campus Nursery Officer and Staff
- Hospital Pharmacists
- Human Resources Specialists and Staff of Hospital
- Information Technology System Personnel and Staff of Hospital
- Manager and Assistant Manager of Hospital
- Public and Media Officer of Hospital
- Religious Services Personnel

▶ Who Can Participate?

- Revolving Fund Enterprise Managers of Hospital
