Mental Health Issues in the Setting of Acute Traumatic Injury: Interventional Tools for the Trauma Provider

Presented by the EAST Injury Control & Violence Prevention Committee

Location: Location: JW Grand Salon 5-6

Patients exhibiting thought disorganization and behavioral dysregulation may be involved in circumstances requiring hospitalization secondary to traumatic injuries. Additionally, new onset psychiatric conditions may develop after a traumatic injury such as acute stress disorder, post-traumatic stress disorder (PTSD), or adjustment disorder. One in four trauma patients develop PTSD symptoms. A meta-analysis looking at the role for psychological interventions in reducing the incidence and severity of psychiatric sequelae in trauma survivors found that cognitive behavior therapy-treated patients experienced clinically but not statistically significant decreases in symptom severity. This session aims to guide healthcare providers who wish to better understand and help treat mental health issues in the acutely injured trauma patient.

Moderators: Tanya Anand, MD, MPH & Sara Higginson, MD

Speakers:

Aaron Meyer, MD – Acute Agitation- Primary Psychiatric Diagnosis or Secondary to Medical Condition

Leah Tatebe, MD – Mitigating Acute Psychological Injury Through Trauma Informed Care in the Acute Injured Patient

Navigating the Multicenter Trial Minefield: Pearls & Pitfalls from Veterans

Presented by the EAST Multicenter Trials Committee

Location: Location: JW Grand Salon 5-6

The development and execution of a multicenter trial is a major undertaking for any investigator. For the early-stage investigators running a multicenter trial it may seem overwhelming, and without local support or mentoring, their research interests may be stymied. Through presentations and a subsequent panel, this session aims to offer future principal investigators and participants in EAST multicenter trials the ability to learn from the both the successes and failures of seasoned investigators who have led and/or are currently leading multicenter trials.

Point of Care Ultrasound in the ED-Bridging the Specialty Gap

Presented by the EAST Emergency General Surgery Committee

Location: Location: JW Grand Salon 1-4

This session will evaluate the current evidence behind EM POCUS and how it can be applied to surgical decision making. There will be a review of current standards for training, image storage and quality assurance. Evidence from both EM and Acute Care Surgery will be presented, and the session will attempt to identify best practices for patients being managed collaboratively by both specialties. The session will also explore how increased training on bedside ultrasound during surgical residency may increase the use of POCUS by the ACS surgeon. By working together, surgeons and emergency physicians can provide better and more efficient care for our patients.
