2016 Request for Access to AAST Multi-Institutional Trials Data Collection Site for Participation in the EAST Multicenter Trials

The EAST Multicenter Trials Section is accepting proposals for new Multicenter studies and soliciting participation for recently approved studies. Each study is headed by one Coordinating Center, which is primarily responsible for designing the protocol and data collection sheets. After appropriate input and revisions, the studies are posted on the AAST-MIT webpage and interested centers may participate.

Each study has a data collection sheet and study protocol on the EAST website. Direct communication with the study PI prior to participating in the study is strongly encouraged. The EAST Multicenter Trials Section is looking forward to your enthusiastic support and participation in these and future studies.

If you would like access to enter data for a study, please complete the form below.

KEYWORDS:

STUDY PI: This is the primary investigator of the study. The Study PI can see ALL data entered for a given study and can pull full reports across all sites/institutions. There is only one study PI.

SITE PI: This is the primary investigator for a given site/institution. The site PI can see ALL the data entered for a given site/institution and can pull reports for that site/institution.

NOTE: Please make sure to confirm with your Site PI how the name of your hospital/institution should be listed on the form. The slightest difference can affect the data reports.

If you have questions or would like more information on the EAST Multicenter Trials please contact Rachel Dixon at rdixon@east.org
2016 Request for Access to AAST Multi-Institutional Trials Data Collection Site for Participation in the EAST Multicenter Trials
