Periprosthetic joint infection (PJI) is one of the most challenging and frequent complications after lower-extremity joint (hip and knee) arthroplasty.

The inaugural Periprosthetic Conference has an internationally renowned faculty who will discuss all aspects of periprosthetic joint infection including basic sciences, diagnosis, clinical features and the necessity of a multidisciplinary approach.

Who should attend?
- Consultant Orthopaedic surgeons
- Orthopaedic trainees
- Microbiology specialists
- Infectious disease specialists
- Arthroplasty nurse specialists
- Arthroplasty physiotherapists

Venue
Royal College of Physicians and Surgeons of Glasgow

Date
Thursday 25 October 2018

BOOK NOW
W: rcp.sg/events

T: +44 (0)141 221 6072
The Conference consists of a series of lectures, panel discussions and clinical scenarios outlining the latest research and up to date consensus on managing this challenging clinical issue.

**Learning Objectives**

- Epidemiology and basic science of periprosthetic infection
- Prevention of periprosthetic infection
- Recognise the indications of when periprosthetic infection occurs and diagnosis
- The management of periprosthetic infection
- A multidisciplinary team approach is mandatory
- The importance of audit
- Research and future developments of management of periprosthetic infection
